

Task 4 — Dashboard Summary

Objective & Tools

Build an interactive Superstore business dashboard using the provided dataset and present key findings.

Key KPIs

Total Sales: \$2,297,200.86

Total Profit: \$286,397.02

Total Orders: 5,009

Profit Margin: 12.5%

Time Series

Sales and profit increased overall from 2014 to 2017. 2014 Sales: \$484,247.50. 2017 Sales: \$733,215.26.

Category & Region Insights

Technology had the highest category sales (about \$836,154) and profit (about \$145,455). West had the highest regional sales (about \$725,458).

Profitability

Tables showed negative profit of about -\$17,725. Bookcases and Supplies were also negative.

Dashboard Interactivity

Filters: Year, Category, Region, and Segment, with KPI cards and interactive charts.

Recommendations

Use the dashboard to identify profitable categories and regions and investigate sub-categories with negative profitability.

Conclusion

The dashboard provides an interactive view of Superstore sales and profitability trends.
